 Madison, WI 53704
 Phone: (608) 243-3370
 E-mail: sandra.spann@dot.state.wi.us

Study area expanded

In 2003, WisDOT began studying potential improvements to the US 14/WIS 11 corridor between US 51 in Janesville and I-43 near Darien. Recently, the US 14/WIS 11 corridor study has been expanded to include a possible connection between US 14 and the existing WIS 11 bypass on the west side of Janesville. This potential connection could help relieve traffic congestion on US 14 in Janesville and also provide a relief route for I-39/90.

US 14/WIS 11 corridor study area

Public information meeting

In order to introduce the expanded study area and gather public input on the new segment, an information meeting will be held:

June 28, 2005
Holiday Inn Express
3100 Wellington Place, Janesville
4 to 7 p.m.

The open-house meeting will focus on the possible connection of US 14 to WIS 11 on the west side of Janesville. People will be able to review exhibits and talk with WisDOT representatives. A brief presentation will take place at 6 p.m. You are encouraged to attend this meeting and share your knowledge of the project area.

Updated project schedule

Public information meeting (introduce expanded study area).....	June 2005
Develop preliminary alternatives.....	Summer 2005
Public information meeting (discuss potential alternatives).....	Winter 2005-2006
